

## Product data sheet for uvex profabutyl B-05W

The uvex profabutyl B-05W is a water-based butyl rubber safety glove with excellent chemical and biological protection. Highly flexible and soft with excellent tactile feel, it also offers high chemical resistance for handling critical hazardous substances such as esters, ketones, aldehydes, amines, saturated saline solutions, acids, alkalis and solvents. Very good grip in damp and wet areas due to the roughened surface.

### Features

- Extremely flexible
- Very good tactile feel
- Highly durable

### Suitability for industrial working environments

- suitable for damp and oily but also dry working environments
- for damp and wet working environments
